

Civil Engineering Department

Vision -

To impart excellent knowledge in civil engineering to students to develop professional ability to manage the projects and make them innovative and ethically strong engineers to serve the nation.

Mission -

- To produce Civil engineers of high calibre competent to solve engineering problems
- To create competent professionals who are able to design civil engineering systems.
- To produce civil engineers capable to manage projects.
- To promote innovative ideas in the mind of budding engineers and to develop ethical values in order to serve society

1	P. N. Naik	Lab Assistant

PROGRAM EDUCATIONAL OBJECTIVES (PEO's)

PEO 1. To develop civil engineers able to solve engineering problems.

PEO 2. To create civil engineers able to analyse problems and use different National and Local codes for design and use appropriate tools.

PEO 3. To Use appropriate management techniques and apply management principles.

PEO 4.To develop students for Social and ethical values and make them environmental sensitive.

PEO5. To encourage the students for continuous learning to adapt technological developments.

PROGRAM SPECIFIC OUTCOMES (PSO's)

PSO 1. Construction Planning and Designing: Perform optimal civil engineering construction, planning and designing activities of desired quality at optimal cost.

PSO 2. Construction Execution and Maintenance: Execute Civil Engineering construction and maintenance using relevant materials and equipments.
